

INDRA
EVERYTHING WATER.

Building **Sustainable** Future

Our Vision

To drive the world's transition towards sustainable water management.

"50 million liters saved and counting."

What we do

Solving the toughest water & process challenges wherever they occur.

Products (up to 500 KLD) Economical. Compact. Smart.

Decentralized Water Treatment Systems for Recycling Domestic & Industrial Wastewater for reuse in non-potable applications.

•Flow Series (F)

Electrocoagulation based system for treatment of residential, commercial & municipal wastewater.

•Activated Flow Series (AF)

Activated Flocculation and Activated Treatment process coupled with Flow Series for Industrial Effluent Treatment.

•**Electrox Series (E)** Advanced treatment for high COD wastewater, combines Activated Flow Series with Electrochemical oxidation technology.

Target Sectors

Residential & Commercial

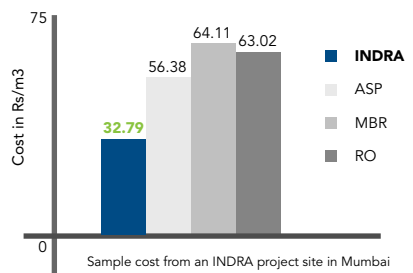

Textiles & Dye

Paper & Pulp

10 Year Life Cycle Cost Comparison - STP (100 KLD)

Projects

Indra Flow Series 75 KLD - F75 at Godavari Bio-Refineries Ltd., Maharashtra, India

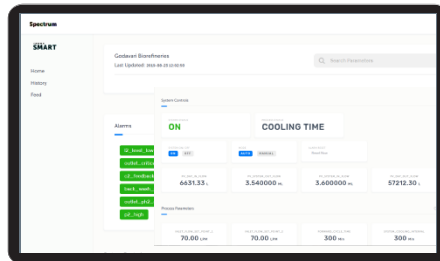

"We engineer quality with reliable data & robust design"

25 KLD Sewage Treatment for recycling & reuse for gardening at K J Somaia Campus, Mumbai

20 KLD Textile Dye effluent treatment for process reuse at Sands Synergy Private limited, Mumbai

INDRA Smart & Spectrum

Pushing the boundaries of automation with "Industry 4.0 IoT"

INDRA Smart & Spectrum Software Snapshot

Smart is our automation platform which optimizes systems to improve treatment efficiency, consistency and reduce operational costs. It enables remote system control, fine tuning and real time troubleshooting. **Spectrum** is an advanced analytics platform which provides data driven predictive analysis for better water management.
